

Program: ERRAT2
File: /var/www/SAVES/Jobs/7223541//errrat.pdb
Chain#:1
Overall quality factor**: 83.399

*On the error axis, two lines are drawn to indicate the confidence with which it is possible to reject regions that exceed that error value.
**Expressed as the percentage of the protein for which the calculated error value falls below the 95% rejection limit. Good high resolution structures generally produce values around 95% or higher. For lower resolutions (2.5 to 3Å) the average overall quality factor is around 91%.

Figure S2- Errat result showing overall quality factor of COX1
